Art Unit: 1625

The following is an examiner's statement of reasons for allowance: The claimed method for producing maleic anhydride by means of catalytic gas phase oxidation is regarded as novel over the prior art owing to the specific temperature conditions that have to be constantly maintained. The above referred to, instantly claimed method of regulation of the temperature of the heat transfer medium in response to the experimentally determined "runaway temperature" is also unobvious over the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bernard Dentz whose telephone number is 571-272-0683. The examiner can normally be reached on Mon.-Fri. 8AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cecilia Tsang can be reached on 571-272-0562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
